History:

This message has been forwarded.

Rod, I'd like to close out the EPA request! Thank you very much!!

Best,

Anna

Thats the only thing on the CD.

I still need to know what you want done with the current requests you have with EPA.

Stakeholders who are using the water:

There are six residences that are currently affected by VOCs in the groundwater, and five of those residences are receiving water from the City of Pasco. There is only one who continues to refuse the alternate sources of domestic water that have been offered to him.

His water is tested on a quarterly basis and his well continues to meet federal drinking water standards, but does not meet the more stringent standards of the Model Toxics Control Act and the corresponding cleanup level for VOCs.

Re: power point Pasco Landfill

Hi Rod,

I'm wondering what other information is on that CD. In particular, I'm wondering if there is any information regarding costs and/or stakeholders (e.g. residents affected by the contaminated groundwater, etc). I think that the slides cover the science / remediation part really well! I will probably give Chuck a call sometime to gather more information about costs, as per your suggestion. :-D

Thanks!

Best,

Anna
